Bapu Mane (5.6 Years)

Role - Automation Engineer | Fullstack Engineer | Senior Test Engineer

CV Highlights

• Automation Engineer

- Committed to continuous learning and staying updated with the latest automation testing trends and technologies through certifications, training, and participation in industry conferences.
- Demonstrated ability to analyze complex systems, identify test scenarios, and troubleshoot issues effectively to ensure high-quality software delivery.
- Extensive experience in designing and implementing automation frameworks using Selenium, Appium, and Cucumber.
- In-depth knowledge of Agile methodologies and experience working in Agile environments, participating in sprint planning, daily stand-ups, and retrospectives.
- Proficient in using test automation tools like Selenium WebDriver, TestNG, JUnit, and Postman for API testing.
- Skilled in programming languages such as Java, Python, and JavaScript, with a focus on writing clean, maintainable code for test automation.

• Fullstack Engineer

- Committed to continuous learning and staying updated with the latest full stack development trends, tools, and best practices through certifications, training, and participation in industry conferences.
- Experience in developing and maintaining web applications using both front-end and back-end technologies.
- Experienced in working within Agile project environments, participating in sprint planning, daily stand-ups, and retrospectives to ensure timely delivery of features.
- Hands-on experience with both relational databases (MySQL, PostgreSQL) and NoSQL databases (MongoDB, Redis), including database design and optimization.
- Skilled in using HTML, CSS, JavaScript, and frameworks like React, Angular, and Vue.js to create responsive and user-friendly interfaces.

• Senior Test Engineer

- Deep understanding of QA methodologies, SDLC, and STLC processes.
- Experience in functional testing, including manual and automated testing of web and mobile applications.
- Experience working in Agile/Scrum environments, participating in sprint planning, daily stand-ups, and retrospectives.

Practitioner

- Katalon Certification - Professional
- MySQL
- Oracle SQL
- Selenium Certification
- TestNG
- MS SQL
- Watermelon
- Java

Company Details

- **Qualitykiosk Technologies Pvt Ltd**

Senior Test Engineer
(May-2022 - Till now)
Mumbail

- **L&D INFOTECH PVT LTD**

Test Engineer
(Jan-2019 - Apr-2022)
Pune

Hobbies

- Reading Books
- Coding Challenges
- Exploring New Testing Tools
- Learning New Programming Languages
- Traveling

- Expert in identifying, reporting, and documenting defects using industry-standard tools.
- Proficient in using test management tools like JIRA, TestRail, and HP ALM for test planning, execution, and reporting.
- Proven ability to design, develop, and execute detailed test plans and test cases.
- Skilled in conducting UAT to validate end-user requirements and business functionality.

Tools

Jmeter , Katalon , Postman , RestAssured , Postman , eclipse , ETL/DB Migration testing , Git , Jmeter , Junit , Katalon , Maven , MS SQL , Oracle , Playwright , Selenium , Watermelon , Webdriver IO , Bugzilla , Github , Jira , QRACE , My Workbench , MySQL , Oracle , Appium , Katalon , Watermelon , Excel Reporting , Jira , QRACE , TestLink , Watermelon , Zaphyr , Katalon , Playwright , Selenium , Watermelon , Webdriver IO

Methodology / Concepts

agile methodology , Scrum , Agile Model , SDLC , SDLC

Seniority

People

- Can mentor juniors and interns on testing methodologies and tools
- Can provide constructive feedback during peer reviews

Communication

- Can communicate clearly with cross-functional teams (developers, product owners, etc.).
- Able to convey complex testing issues in non-technical terms to stakeholders.
- Facilitates and leads testing-related meetings (stand-ups, retrospectives).
- Can write detailed and actionable bug reports, test cases, and documentation.
- Skilled in providing feedback and status updates on project timelines.

Engineering Excellence

- Demonstrates expertise in designing and implementing testing frameworks / strategies
- Can identify potential areas of improvement in QA tools, practices, and strategies

Roaming Billing system

Team Size: 5

Roaming is the ability for a customer of mobile communications to automatically make and receive telephone calls, send and receive data, or access other services while travelling outside the geographical coverage area of the home network, by means of using a network of another operator. Roaming can be either national roaming or international roaming. National roaming means that mobile subscribers make use of another network in geographical areas, where their own operator does not have coverage. This is, e.g., used by operators, who do not have complete coverage in a country. International roaming is used when mobile subscribers travel abroad and make use of the network of an operator in the foreign country. CDRs generated in one roaming partner's area are collected and rated by that roaming partner and finally they are sent to the actual service provider of the roaming customer. Actual service provider charges the end customer for all the roaming services provided based on their predefined service charges.

Testing of Fraud Management System

Team Size: 1

- Clari5 Solution is an event-based solution that is capable of consuming multiple transaction events from various source systems. Source systems can integrate with the Clari5 Solution by leveraging its externally exposed APIs in two fashions, namely: Prevention Mode and Monitoring Mode.
- Prevention Mode refers to the type of integration where a source system invokes the DECIDE API of the Clari5 solution which is a synchronous call to which the solution responds with an advice derived via processing the event against the configured scenarios. Source system calls the DECIDE API before a transaction gets committed in the system i.e., pre-call.
- Monitoring Mode requires the invocation of an asynchronous ENQUEUE API by the source system after the transaction is committed in the system i.e., a post-call.
